

GAINING COMPETITIVE ADVANTAGE THROUGH ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG) LEADERSHIP

Customers, financiers, regulators, and employees are increasingly asking Vietnamese business leaders about their companies' ESG credentials. Incorporating ESG into business strategy is becoming an essential contributor to future commercial success and corporate value creation.

How can relevant ESG strategies be employed by visionary executives in Vietnam to improve business performance and gain competitive advantage in their industry?

In this event, ESG experts from the region will be joined by a panel of business leaders from leading Vietnamese companies to share their insights on ESG strategy through presentations and a panel discussion.

18 MARCH
2021
